

Malay Adalja

QA Automation Engineer (SDET) — Playwright · Python · Payments

Seven years on crypto payments. BTC, ETH, USDT, XAUT, Lightning, ERC-20 contracts, payouts. Manual and automated. API and database. Web and mobile. When the tooling ran out, I built my own.

Ahmedabad, India malayadalja123@gmail.com linkedin.com/in/malayy-j-adalja

Open to work · remote or hybrid

EXPERIENCE

7 yrs 4 mo

QA only, from Jun 2019

DOMAINS

Crypto payments

BTC · ETH · USDT · XAUT · LN

NOW

Openxcell

Software Engineer — QA

BASED IN

Ahmedabad, IN

open to remote

CORE SKILLS

Manual & exploratory

Designed and ran the test suites for 15+ delivered projects.

Test design · Exploratory charters · Regression strategy · UAT · Defect triage

API testing

Collection-driven API suites run in CI alongside the UI layer.

Postman · Newman · REST · Auth flows · Contract validation

Performance

JMeter scripts for withdrawal and high-volume transaction flows.

JMeter · Load profiling · Throughput analysis

Test automation

Automated payout and instant-send workflows end to end; Appium suites for Android.

Playwright · Selenium · Appium · Pytest · CI pipelines

SQL & data verification

Post-transaction DB checks on payment, payout and cashback flows.

SQL · DB verification · Reconciliation · Audit trails

AI tooling

Used them to build Aegis-QA. Runs, API tests, SQL, Datadog and recorded scripts in one place.

Claude · Claude Code (CLI) · ChatGPT · Cursor · GitHub Copilot · Kimi 2.5 · Emergent · Datadog AI

CRYPTO PAYMENT COVERAGE

Bitcoin · on-chain	Lightning Network	Ethereum · native	Tether · ERC-20	Tether Gold
Smart contract	Crypto payout			

EXPERIENCE

Software Engineer — QA · Openxcell

APR 2023 — PRESENT

- Tested major payment modules including Metadata, Customer, Swap, Payout, Instant Payout and Transfer.
- Built and maintain Aegis-QA, internal tooling for runs, API tests, SQL, Datadog and recorded scripts.
- Created Appium automation scripts for Android mobile testing.
- Built JMeter performance test scripts for withdrawal and transaction flows.
- Automated payout and instant send workflows end to end.
- Performed Bitcoin and Lightning payment workflow testing.
- Validated cashback workflows and transaction accuracy against the database.

QA Engineer · Auxano Global Services

JUN 2019 — APR 2023

- Performed manual testing across mobile apps, websites, games and WordPress platforms.
- Designed and executed test cases and end-to-end scenarios.
- Executed functional, regression and UAT cycles.
- Created documentation, reports and defect tracking.
- Used JMeter for performance testing.
- Delivered testing on 15+ complete projects.

Technical Recruiter · Skillventory

JAN 2019 — APR 2019 · BEFORE QA · HR

- Handled sourcing, screening and scheduling for technical roles.
- Conducted candidate evaluations for skills and cultural fit.

SELECTED PROJECTS

Speed — crypto payment platform · 2023 — present

Merchant checkout, payment links, refunds and crypto payouts across BTC, ETH, USDT, XAUT and the Lightning Network, plus ERC-20 smart contract testing, e-commerce plugin integrations and localization.

Playwright · Postman / Newman · SQL · JMeter · Appium

Aegis-QA — the tooling I built · Nov 2025 — present

An internal platform I built to manage the QA work itself: triggering runs, API testing, Playwright scripts, SQL queries, Datadog lookups and test-case management with automation-script recording, all in one place.

Python 3.12 · Playwright · asyncio · FastAPI · Next.js · Docker

KYB / KYC onboarding · 2023 — present

Merchant verification through a third-party identity provider. LLC and Corporation flows, document upload, beneficiary checks and liveness.

Playwright · SQL · Postman

TOOLKIT

AUTOMATION

Playwright · Selenium · Appium · Pytest · Newman
